

Air Ag

Airstrip Dimensions

Runway width – Minimum 8m

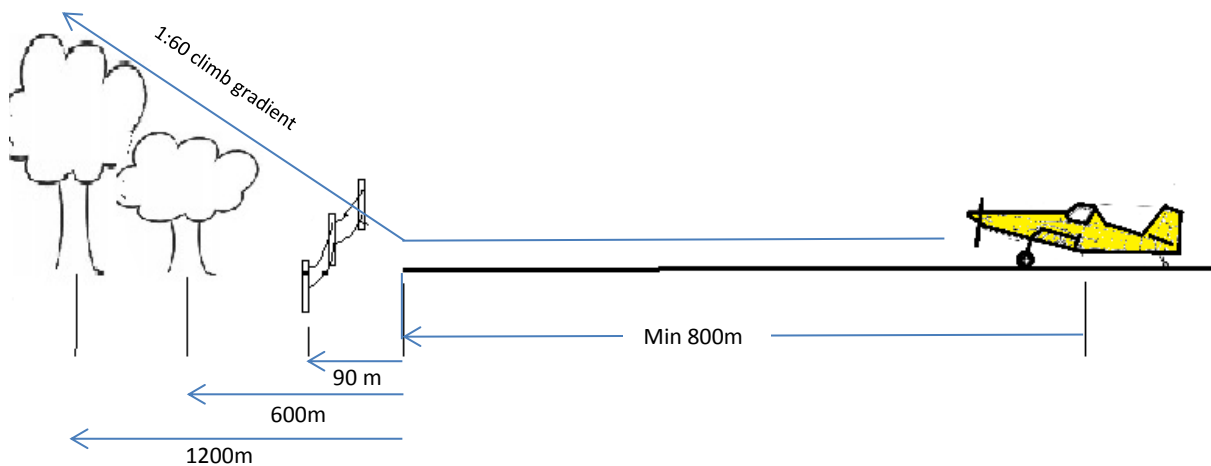

- Hard smooth surface. You should be able to drive down it in a 4WD at 100kph

Over Run width – Minimum 25m

- Should be clear of obstacles and relatively smooth to allow an aircraft run off in an emergency
- Any crops or bushes should be no more than 300mm tall

Overfly width – Minimum 40m

- Should be clear of obstacles to allow an aircraft to overfly at low level
- No obstacles higher than 1.5 m

Length

- Minimum runway length - 800m hard smooth surface
- Cannot count distance before an obstacle
 - Allow 1:60 climb gradient
 - A 1.5m fence must be no closer than 90m from end of the strip
 - A 10m high tree must be no closer than 600m from the end of the strip
 - A 20m high tree must be no closer than 1200m from the end of the strip
